

① WAVEFORM MENU

All the sounds included in your Pack can be selected using the Waveform Menu without losing your synth settings. You can also choose your sound using the Prev - Next buttons.

② SAMPLE MAPPING

The selected drum sample can be spread across the keyboard or it can be played regardless of the incoming MIDI notes.

③ PARAMETER DISPLAY

Here you can monitor all the parameter settings.

④ EQUALIZER

One-band peak equalizer with automatic limiter. You can boost or cut any frequency range by up to 6 dB.

⑤ VOLUME ENVELOPE

Classic AHD Volume Envelope with adjustable Attack Slope.

⑥ EFFECTS

Use the Warmth control to boost the low frequency and Punch to double the sample playback and make the drum louder.

⑦ PITCH ENVELOPE

One-shot envelope to change the pitch of the drum.

⑧ DISTORTION

This effect simulates the behavior of overloaded transistor (Mod. A) or tube circuits (Mod. B), adding artificial harmonics to the drum.

⑨ TRANSIENT SHAPER

Powerful tool to increase or decrease the attack and sustain levels of your selected drum.

⑩ FILTERS

Droom features two independent State Variable filters : 2-pole lowpass and 4-pole highpass.

AUTOMATION Up to 18 synth parameters can be automated in your favorite DAW.
